

Guide to technical updates

In payment protocols

- Old payment API
- iframe payment forms
- YooMoney API (and payment widget)
- Ready-made payment module
- Payment requests via MWS
- H2H acquiring protocol

In YooMoney libraries

- YandexCheckout UI
- YandexCheckout.js
- YandexCheckoutCreditUI
- Mobile SDK
- SDK for PHP and Python

In reports

In payout protocol

In data collection forms

Changes in payment protocols

Our service has moved to a new domain and, as a result, the payment request links for all payment methods have been changed. The old ones still work but we recommend updating them before **February 15, 2021**.

Here are the changes you need to implement on your side (give this information to your developer):

— If you're connected via [the old payment API](#)

Update the payment request links:

- Old link: <http://money.yandex.ru/eshop.xml>
- New link: <https://yoomoney.ru/eshop.xml>

— If you use iframe

Update the **"source"** parameter when you call iframe by changing the domain in the payment link:

- Old one: <http://money.yandex.ru>
- New one: <https://yoomoney.ru>

Documentation: [Payment form](#)

— If you're connected via the payment API (or if you use the payment widget)

Update links and parameters (you need to update everything at once):

- New address for requests: <https://api.yookassa.ru/v3>
- New payment method code: `yoo_money` (instead of `yandex_money`): send us `"yoo_money"` as the payment method. It's also used in incoming notifications and payment information.
- `cancellation_details` object update: if YooMoney cancels a payment or if a payment results in an error, instead of `"party" : "yandex_checkout"` we'll send you the `"party" : "yoo_money"` parameter.

Important: if you created a payment with the old address (<https://payment.yandex.net/api/v3/>) and moved to the new one, notifications for the payment will be sent without changes (same as they were sent before). However, the payment method code in the GET `/payments` request for payment details sent by the new address will also be updated to `yoo_money`.

Documentation:

[Basics of working with API](#)

[YooMoney payment methods](#)

[Unsuccessful payments](#)

— If you're connected via the payment API (or if you use the payment widget)

Use new settings to work with the widget:

- Name: **YooMoney Checkout Widget**
- New library URL: <https://yookassa.ru/checkout-widget/v1/checkout-widget.js>
- New class name: **YooMoneyCheckoutWidget**

Documentation: [YooMoney Checkout Widget](#)

— If you use our ready-made module

All changes will be implemented by the developer of your module or CMS: just wait for the update (we've already contacted them with further instructions).

— If you generate payment requests via MWS

Update the address of the server for calling the operations:

- Old address: <https://penelope.yamoney.ru>
- New address: <https://shop.yookassa.ru>

No need to update current authentication certificates: they will keep working.

Documentation: [Financial operations](#)

— If you use the H2H acquiring protocol

Payment requests must be sent to a new address (the domain has changed from yamoney.ru to yoomoney.ru):

- Old one: <https://paymentcard.yamoney.ru:9094>
- New one: <https://paymentcard.yoomoney.ru:9094>

No changes in the request parameters.

Changes in libraries

— YandexCheckout UI

Our widget's UI-library has a new name: **YooMoneyCheckoutUI**. New class name is **YooMoneyCheckoutUI** (instead of YandexCheckoutUI).

New link for downloading the library: <https://static.yoomoney.ru/checkout-ui/v1/checkout-ui.js>

Documentation: [Checkout UI](#)

— YandexCheckout.js

The widget's library is now called **YooMoneyCheckout**. New class name is **YooMoneyCheckout** (instead of the old one, YandexCheckout).

New link for downloading the library: <https://static.yoomoney.ru/checkout-js/v1/checkout.js>

Documentation: [Checkout.js](#)

— YandexCheckoutCreditUI

Our credit widget's library is now called **CheckoutCreditUI**.

The addresses for requests and implementing the library have been changed:

- Address for requests: <https://yoomoney.ru/credit/order/ajax/credit-pre-schedule>
- Address for implementing the library: <https://static.yoomoney.ru/checkout-credit-ui/v1/index.js>

Documentation:

[Credit widget](#)

[Credit widget \(old payment API\)](#)

— Mobile SDK

We've released an important update for the library of our SDK. We recommend installing it so the library will continue to work properly.

[Update for iOS](#)

[Update for Android](#)

— SDK for PHP and Python

If you use these libraries, download the updated versions:

- PHP: <https://github.com/yoomoney/yookassa-sdk-php>
- Python: <https://github.com/yoomoney/yookassa-sdk-python>

Usage examples can be found in the documentation.

Changes in reports

Since December, we're sending out reports with the updated information about our service: the name is YooMoney, and the new email address is paymentcenter@yoomoney.ru (instead of paymentcenter@yamoney.ru).

New fields have been added: "Payer's name", "Payer's address", "Taxpayer's Individual Number (INN)". They will be filled out only if the payment was made from a YooMoney wallet in an amount exceeding 15,000 rubles.

If you've set up automatic processing of reports (parsing), you'll need to reconfigure it: please tell your developer. Changes must be implemented before February 15, 2021.

No changes in [the report format](#).

Changes in payout protocol

Our service has moved to a new domain and, as a result, the link for payment requests has been changed.

- Old address: <https://calypso.yamoney.ru:9094>
- New address: <https://payouts.yookassa.ru:9094>

You can find the latest information in [the documentation for payouts](#).

The old address still works but we recommend updating it before February 15, 2021.

Data collection forms

If you use the forms for collecting bank card data and user data, please update the addresses.

[Request for bank card synonym](#)

- Old address: <https://paymentcard.yamoney.ru/gates/card/storeCard>
- New address: <https://paymentcard.yoomoney.ru/gates/card/storeCard>

[Data collection form](#)

- Old address: <https://money.yandex.ru/cardauth/payout>
- New address: <https://yoomoney.ru/cardauth/payout>
